

Sexual immorality and the affects on our society.

People have become so obsessed with what makes them feel good that they are okay with compromising what is right and moral for the sake of satisfying their own appetite for pleasure. This led to practicing sexual immorality but not wanting to suffer the consequences. So, they began to look for ways to avoid these consequences. The condom made way for people to practice sexual immorality "safely". As condoms became easier to make and distribute, less accountability was required. It started with a rise in trying to prevent the consequences. STD's case were rising and people didn't want to have unplanned babies. So, they tried to expand the use of Contraceptives. The Breakdown of the family began with a desire to not take Responsibility, for actions, or for Children. A monumental ideal... a desire not to have Family. It is Remarkable isn't it? The vision was cast for not having Children, the beginning of the despise for Children birthed from a desire to just have fun and play around without suffering the consequences. A very selfish motive to say the least.

Let's look at the United States of America as an example.

1850's By the 1850s, sex education was introduced in public schools to inform students about sexually transmitted diseases and how they are spread. This new area of curriculum came in response to rising STDs rates in America. Although increased education was important, abstinence, however, was taught as the sole method for preventing disease, and the stigma for individuals with an STD remained so strong that many were refused treatment by hospitals.

1900's By the turn of the 20th century, condoms were the most popular form of birth control in Europe and North America.

1914 During WWI, America saw 400,000 cases of syphilis. They did not standard issue Condoms at this time.

1920's condom sales doubled, as advertised as a way to prevent STD's. (Sin with no consequences.)

1930's

- In the 1930's it was legal to advertise Condoms, and in the 1940's STD's saw a decline until...
- The Hays Code (Production Code) monitored Commercial television to moral standards. This Code was abandoned in 1967

1950's during WWII. Condoms were standard issue for the military, but STD's made a significant comeback during these years.

1953 Hugh Hefner founder of Playboy issues it first magazine in December. Just another way of indulging in sexual immorality but trying to avoid the consequences.

Less responsibility leads to bad Parenting, or a lack of parenting. Thus we begin to see the *Dissolving of the Family Structure* and the decline of the nation. There was a dramatic increase in single-parent families in the United States in the last three decades of the twentieth century, despite all of these actions toward "planned parenthood". In actuality, in our effort to prevent the Consequences, we actually began breeding Bigger Consequences unseen, *The Breakdown of the Family resulting in the breakdown of our Society casting off all restraint.*

1960-1970's

- The introduction of the "Pill" in 1960 revolutionized birth control and lead to the sexual revolution of the 1960s. The Pill quickly became the most popular form of birth control followed by condoms.
- In 1965 the divorce rate was 2.5 per 1,000 people.
- Only about one-in-ten adults ages 25 and older (9%) in that age range had never been married. By 2012, this increases to 20%.
- 1967 The Hays Code of Hollywood was abandoned.

1970's 13% of families were headed by a single parent in 1970.

- Unmarried women in the United States accounted for nearly 1:10 ratio births in 1970.
- In 1973 Roe v. Wade legalized abortion in the U.S.

1980's The Discovery of AIDS.

- Divorce Rate Increasing to an all time high of 5.0 per 1,000 in 1985.
- Unmarried women in the United States accounted for nearly 1:5 ratio births in 1980

1990's Abortion Peaked with 1.6 million babies killed in the womb by abortion.

- Over one-fourth of children in the United States lived with a single parent in 1996, double the proportion in 1970.
- Divorce Rate declined to 4.4 per 1,000 in 1995. But the # of Single people getting married is also on the decline. Because people don't understand anymore the importance of Marriage and have accepted a counterfeit of living in place of the truth. now they are just "shacking up"
- Unmarried women in the United States accounted for nearly 1:3 ratio births in 1995
- 1990: World Wide Web protocols finished
- 1991: First web page created
- 1995 is often considered the first year the web became commercialized. While there were commercial enterprises online prior to '95, there were a few key developments that happened that year. First, SSL (Secure Sockets Layer) encryption was developed by Netscape, making it safer to conduct financial transactions (like credit card payments) online.
- 1998: Google!

2000's

- In 2003: Skype is released to the public, giving a user-friendly interface to Voice over IP calling.
- 2003: MySpace becomes the most popular social network. there is a bunch of perversion involved with MySpace.
- Also in 2003, MySpace opens up its doors. It later grew to be the most popular social network at one time (though it has since been overtaken by Facebook a less perverse alternative even outlived MySpace).
- There are over 68 million daily searches for pornography in the United States. Thats 25% of all daily searches (IFR, 2006)
- 10% of adults admit to having an addiction to online pornography (IFR, 2006).
- Children as young as 11 years old are regularly accessing hardcore gonzo pornography (IFR, 2006).
- Following first exposure, the largest consumer group of internet pornography is boys between the ages of 12-17.
- 2007: The iPhone and the Mobile Web

2010's

- The sex industry is largest and most profitable industry in the world. "It includes street prostitution, brothels, 'massage parlors', strip clubs, human trafficking for sexual purposes, phone sex, child and adult pornography, mail order brides and sex tourism – just to mention a few of the most common examples." (Andersson et al, 2013)
- In 2010, 13% of global web searches were for sexual content. This does not include P2P downloads and torrents. (Ogas & Gaddam)
- Pornhub receives over 1.68 million visits per hour. (Pornhub, 2013)
- Globally, teen is the most searched term. A Google Trends analysis indicates that searches for "Teen Porn" have more than tripled between 2005-2013, and teen porn was the fastest-growing genre over this period. Total searches for teen-related porn reached an estimated 500,000 daily in March 2013, far larger than other genres, representing approximately one-third of total daily searches for pornographic web sites. (Dines, 2013)
- The United States is the top producer of pornographic dvds and web material; the second largest is Germany: they each produce in excess of 400 porn films for dvd every week.
- Internet porn in the UK receives more traffic than social networks, shopping, news and media, email, finance, gaming and travel. (Arthur, 2013)
- Many studies have reported various findings, but across the board it has been found women watch less porn than men.

2012 In 2012, one-in-five adults ages 25 and older (about 42 million people) had never been married, according to a new Pew Research Center analysis of census data. In 1960, only about one-in-ten adults (9%) in that age range had never been married.

Divorce Rate Increases

The U.S. divorce rate steadily and dramatically increased in the thirty year period 1965 to 1995. However, the amount of people actually getting married severely decreased. so the divorce rate hits a plato at a certain point and can't accurately depict a good illustration of how the family structure is being torn apart. In fact, it just simply isn't there.

The United States has one of the highest divorce rates in the world, twice that of Denmark, Canada, or the United Kingdom.

WHY DO ABORTIONS OCCUR?

On average, women give at least 3 reasons for choosing abortion:

- 75% say that having a baby would interfere with work, school or other responsibilities;
- 75% say they cannot afford a child;
- 50% say they do not want to be a single parent or are having problems with their husband or partner (AGI).
- 12% of women included a physical problem with their health among reasons for having an abortion (NAF).
- 1% (of aborting women) reported that they were the survivors of rape (NAF).

Since 1973 ruling, 58,000,000 babies have been aborted in the U.S.

Studies show that after viewing pornography men are more likely to:

- report decreased empathy for rape victims
- have increasingly aggressive behavioral tendencies
- report believing that a woman who dresses provocatively deserves to be raped
- report anger at women who flirt but then refuse to have sex
- report decreased sexual interest in their girlfriends or wives
- report increased interest in coercing partners into unwanted sex acts (Bridges, 2006) (Yang, Gahyun, 2012).

The Avoidance of Responsibility Breeds Apathy, Sluggardness and Ultimately Evil and Destruction.

Fatherless Homes Breed Violence

According to Getting Men Involved: The Newsletter of the Bay Area Male Involvement Network, Spring 1997:

Begin quote:

63% of youth suicides are from fatherless homes (Source: U.S. D.H.H.S., Bureau of the Census)

90% of all homeless and runaway children are from fatherless homes

85% of all children that exhibit behavioral disorders come from fatherless homes (Source: Center for Disease Control)

80% of rapists motivated with displaced anger come from fatherless homes (Source: Criminal Justice & Behavior, Vol 14, p. 403-26, 1978.)

71% of all high school dropouts come from fatherless homes (Source: National Principals Association Report on the State of High Schools.)

75% of all adolescent patients in chemical abuse centers come from fatherless homes (Source: Rainbows for all Gods Children.)

70% of juveniles in state-operated institutions come from fatherless homes (Source: U.S. Dept. of Justice, Special Report, Sept 1988)

85% of all youths sitting in prisons grew up in a fatherless home (Source: Fulton Co. Georgia jail populations, Texas Dept. of Corrections 1992)

(Because only a portion of each age group grew up in a fatherless home,) these statistics translate to mean that children from fatherless homes are:

5 times more likely to commit suicide

32 times more likely to run away

20 times more likely to have behavioral disorders

14 times more likely to commit rape

9 times more likely to drop out of high school

10 times more likely to abuse chemical substances

9 times more likely to end up in a state-operated institution

20 times more likely to end up in prison.

end quote

To Wrap it all up, our ideal of doing what pleases our sinful desires and trying to avoid the consequences only breeds worse consequences. As the number of Broken home increase, so does amount of lack of accountability. This 3.5% of people in America are actually professing Homosexuals, but with the Hollywood indoctrinating our children who have no Father to tell them it is wrong, we will see this also increase. The next step will be Sodomy.
